

“Name” “State” and “List” are words to look for
They mean that just an answer will suffice
But “Find” and “Calculate” will give you much more
trouble

Sufficient work to show the method would be nice

Co-ordinates always come in pairs
(Along the corridor, Up the stairs)

If the perimeter is to be found
Then measure distance all the way round
But if it's area you've got to write
Then multiply the width by height

If a hole you want repaired
Then use the formula πr^2

Two and a quarter pounds of jam
Weighs about a kilogram

A pint of water
Weighs a pound and a quarter

A litre of water's
A pint and three quarters
